

Products for Car Washing Applications

Car Wash
Division

Prewashing Detergents
Washing Detergents
Auxiliaries Detergents

Introduction

As with other areas of application of its products, also in the car wash sector, AQUOS puts the same care and attention in research and innovation aimed at the creation of specialistics detergents that guarantee full satisfaction of all the needs of the sector operators.

The range of AQUOS products for the car wash sector has been studied in order to achieve products that, in addition to ensuring efficiency and effectiveness in the application, are characterized by high biodegradability of surfactants and by specifically selected raw materials to protect the safety of the operators, the surfaces treated and the environment.

These products, described below, can be subdivided according to the following specific applications:

- Prewashing detergents
- Washing detergents
- Auxiliaries detergents

Prewashing Detergents

CW 200

Biphasic detergent, concentrated, with high emulsifying power, for the washing of cars and vans, tarpaulins and hard surfaces in general. Can be used indoors or in poorly ventilated areas, without causing damage to health of the operator. The product is free from phosphates and generates a dense foam that allows its use with nebulizers without damaging profiles of cars or sides of trucks. **CW 200** provides a large safety of use on coatings with a high concentration of active.

Power Bio

Monocomponent detergent with high emulsifying power. Its characteristics of intensive cleansing can also be obtained at extreme dilutions and in the presence of hard water. It removes effortlessly and without damaging the treated parts, all kinds of dirt: grease, oil, smog, insects, diesel, etc. Due to its characteristics of balanced foam, fast rinsing and safe use, it is used to great effect in the washing stations with self-service high pressure washer or where no use is made of sponge or glove. It contains easily biodegradable surfactants compatible with any system of wastewater treatment.

Eco Prel

Concentrated monocomponent detergent, with high foaming and emulsifying power, particularly effective even at extreme dilutions and in the presence of hard water. It is used effectively at washing stations with self-service pressure washer or where no sponge or glove is used. It removes effortlessly and without damaging the treated parts, all kinds of dirt.

Detergenti Lavaggio

Fast

Car shampoo formulated for proper cleaning the outside of the car.

The special formulation ensures a delicate deter-sion on any paint and color.

Sirio

Neutral shampoo that acts as a washing aid to complete the vehicle cleaning process after the prewash phase. It generates a consistent and soft foam that removes the residual dirt still present on the vehicle while simultaneously exerting a polishing action on the painted parts. The product is ideally used in car wash facilities equipped with a foam bow.

Produced at neutral pH, it does not damage paints, aluminum parts, chrome and plastic parts even when they have been rege-nerated.

Quoter

Concentrated gel car shampoo that washes and polishes, in a single opera-tion, leaving a veil of protection on all types of bodywork. It contains polishing and protective substances able to give maximum protection and shine even to no new cars respecting the liveliness of the original colors. It has excellent rinsing and drying properties and prepares the treated vehicle for possible subsequent treatment with hydrophobic polymeric wax (such as **DIAMANT** or **IDROSPEC**).

Silver

Concentrated detergent specific for cleaning of all washable surfaces inside the vehicles, such as seats, dashboards, luggage compartments, doors and all plastic or aluminum parts and washing of carpet mats and tapestry in general with injection extraction method. The product can also be used effectively in the cleaning of alloy wheels and mudguards made of aluminum or light alloys. Remove all types of dirt, even the most persistent, present in the porosity of the surface and dissolves traces of nicotine from the fibers of the fabrics while eliminating bad odors.

Idrospec

Cationic polymeric wax able to perform its function hydro-phobic even in the presence of hard water or recircled waters without leaving a trace of white residue on the car. It is a product free of mineral oil, doesn't dirty the brushes and the floor of the car wash and not oily car windows.

Diamant

Long-lasting protective and polishing wax that, thanks to its water-repellent action, allows the immediate breaking of the water film and the subsequent pearling, ensuring maximum smoothness and drying under the shower head with minimum effort and energy savings. It is compatible with any water hardness, even recycled, and pre-vents the formation of white residues on the car.

Auxiliaries Detergents

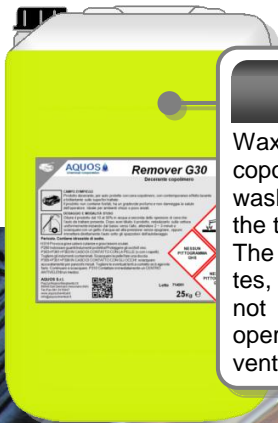

Black G

It is a product able to polish and brighten the color of the tire without anoint them. Suitable for all types of tires, it resists to rain and washing, preserving the tires from cracking, atmospheric and chemical agents.

Kronos

It is a protective polishing product that nourishes and enlivens the treated surfaces, keeping them clean and shiny for a long time. It is ideal for dashboards, plastic coverings, mudguards, vinyl roofs, leather seats and imitation leather, etc. The product, appropriately diluted, can be effectively used also for the cleaning of glass and mirrors.

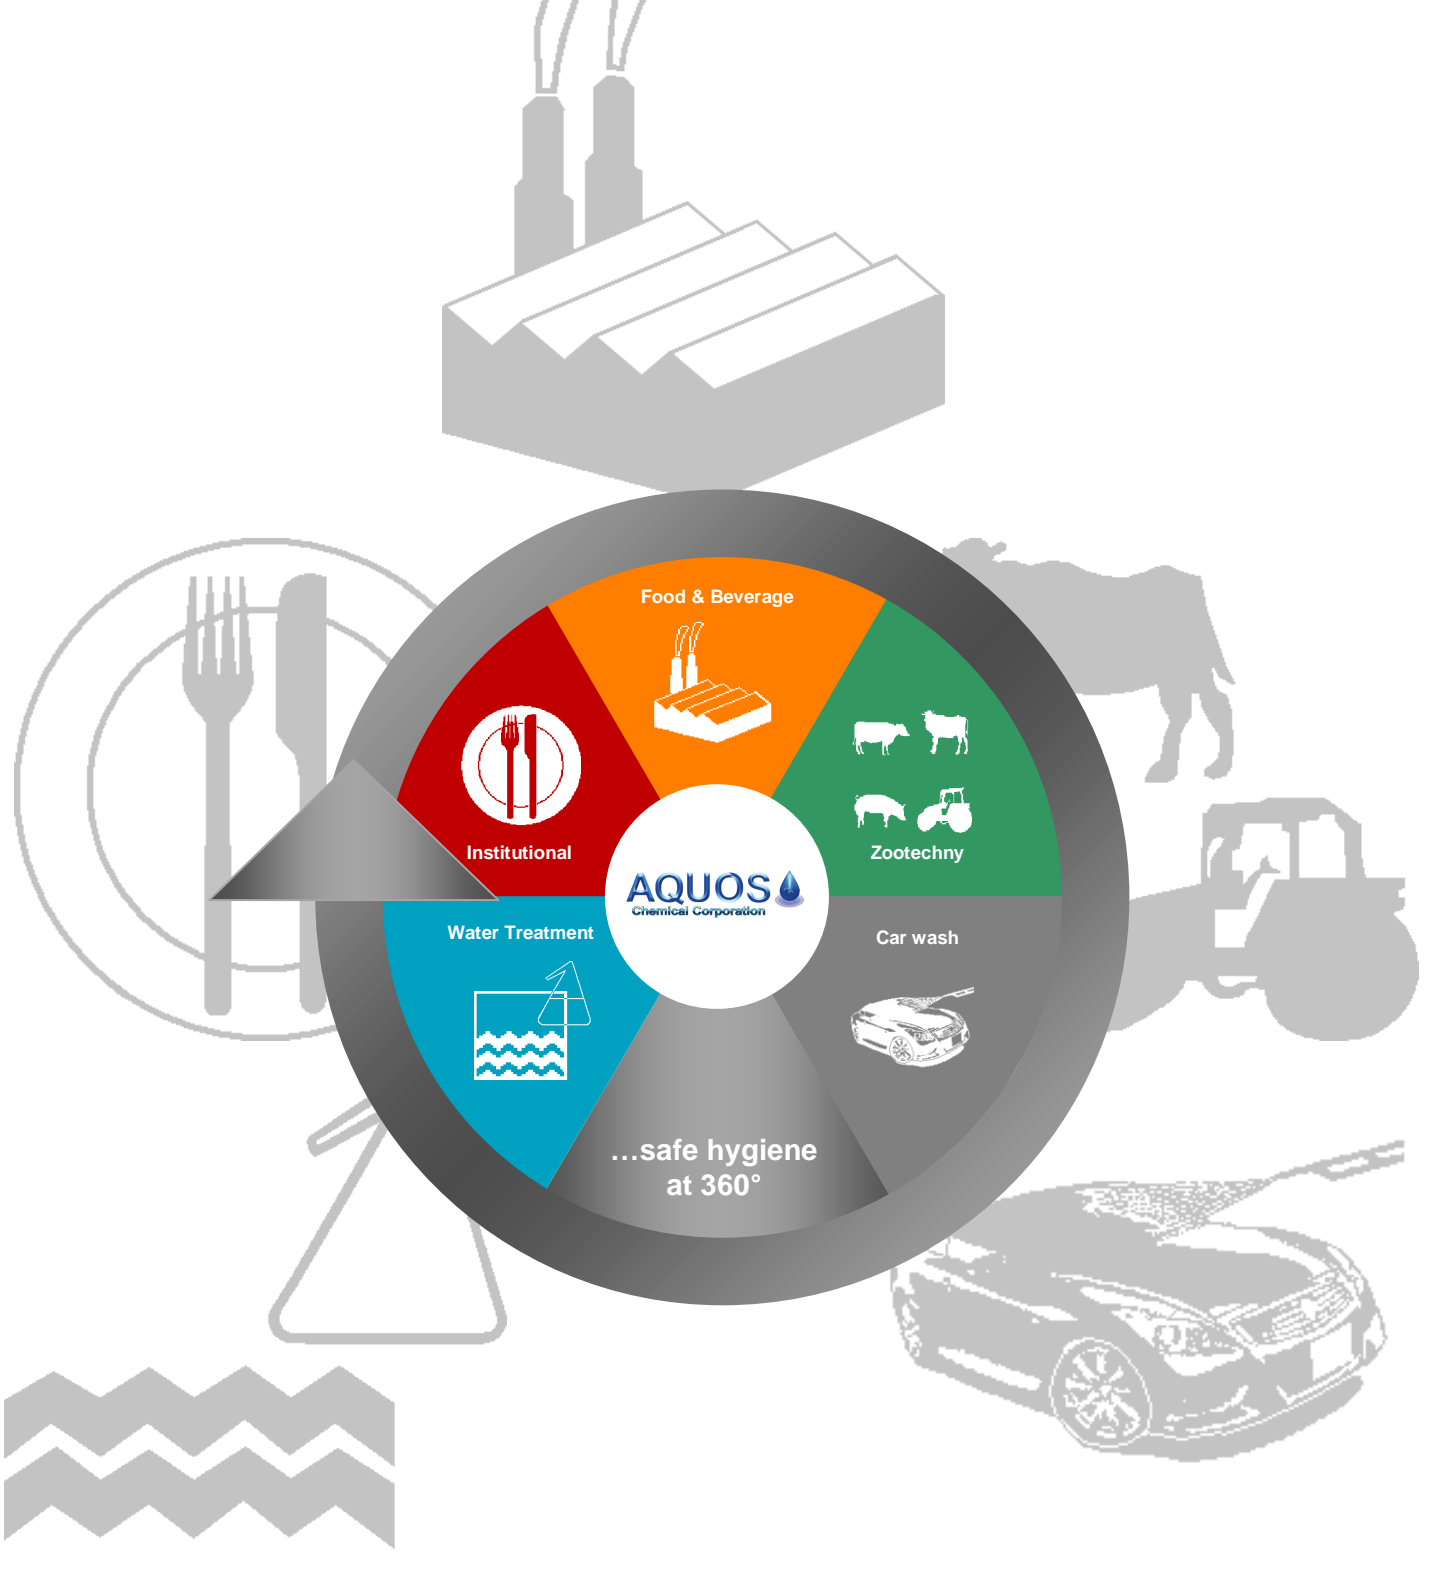

Remover G30

Wax remover for car protected with copolymeric wax, with simultaneous washing and rinsing aid effect on the treated surfaces. The product contains no phosphates, has a pleasant smell and does not damages the health of the operator. Ideal for closed or poorly ventilated areas.

Deo Car

Air freshener sanitizer, ready to use, based on essential oils, ideal for car interiors. Its formula removes the molecules of bad odors leaving a pleasantly, intense and persistent floral scent in the car.
